

# BAZEPORT®

WORLD CLASS SAFETY AND CREW WELFARE  
FOR OFFSHORE AND MARITIME ENVIRONMENTS

**baze**®  
Technology

## FEATURES

BazePort® provides an interactive platform for information, entertainment and communications. Through the BazePort software users get access to easy to use professional applications, TV, Radio, Internet and Video on Demand.

- Internet browsing
- E-mail
- Live TV, PVR, DVR and VoD
- Radio and PodCast
- Telephone
- Safety information (role dependent)
- Alarm clock
- Management Studio
- Additional info such as Safety/HSE and flight schedules, weather, food menus etc

The BazePort infotainment system is truly an all-in-one solution to improve safety, crew welfare and efficiency in offshore and maritime settings.

## EASY TO USE INTERFACE

The interface is made with simplicity and intuition in mind. The result is an user interface well suited for any age, nationality and cultural background.

Language setting are role depended. The optional easy to use touch-screen menu is a tested and proven concept already implemented in more than one thousand BazePort units.

BazePort can be operated with a keyboard and/or remote control

Providing users with an application where no training prior to use is needed.

## BAZEPORT BENEFITS

### EMPLOYEE COLLABORATION AND CREW WELFARE

BazePort® can provide in cabin access to CCTV (IP and analog), increasing safety and integrating operations. VGA output such as navigation, chart display/ECDIS, ROV output etc can be streamed as TV channels to cabins.

### PA / GA MUTE

BazePort® is the only true IPTV system in the market that provides automatic mute of system sound and picture in a PA/GA alarm situation.

### IMPROVED HSE

Training automatically suited to resident and information in emergencies situation.  
Forced content option for secure information delivery  
Message broadcast functionality for instant message to all units on board.

# BAZEPORT BENEFITS

## ROLE DEPENDANT ACCESS

Information and access is granted according to the role of the crew member. In guest mode only entertainment and public information is accessible. In professional mode access can be granted to professional systems e.g. for operation of vessel or platform, or training media can be suited to type of personnel. The possibilities are virtually limitless.

## SIMPLIFIES INSTALLATION

One IP connection does it all! There is no need for coax cabling and separate space consuming equipment (set top boxes and TVs) for entertainment services. No need for separate cabling and space consuming fixed phones in cabins. BazePort provides less equipment to operate and maintain.

## MOUNTED ON A WALL BRACKET

The BazePort terminal can be mounted on a wall bracket for easy access in the cabin. We can provide several different arrangements for use in living accommodation and work areas.

## MODERN AND PROVEN SOLUTION

BazePort is providing a flexible and modern technology to secure a long life in service. It is a proven solution with more than one thousand successful installations in hospital settings. It has low power consumption as the screen goes to idle when not in use.

## POWERFUL PARTNERSHIP

BazePort ® is developed by Baze Technology. BazePort is certified by HP ®, Cisco ® and Microsoft ®.
