

## LocPoint

State-of-the-art web based tracking and control

**The SAILOR® mini-C family from Thrane & Thrane now also offers advanced tracking and fleet management via the web based tracking application LocPoint.**

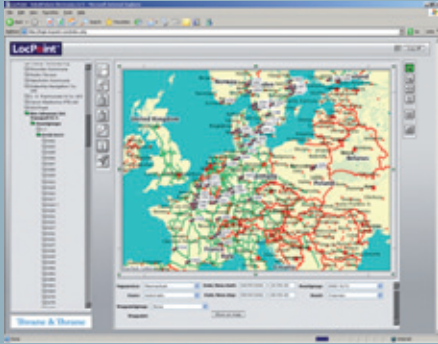

- **Web based**
- **Free of charge**
- **User friendly**

### **Seamless integration with SAILOR® mini-C terminals**

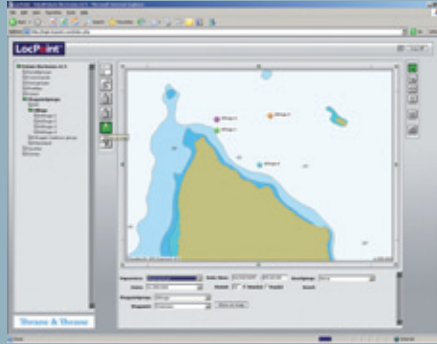

This free of charge system has been designed to integrate seamlessly with all the features of SAILOR mini-C terminals and enhance the usability of SAILOR mini-C transceivers.

### **Easy to use**

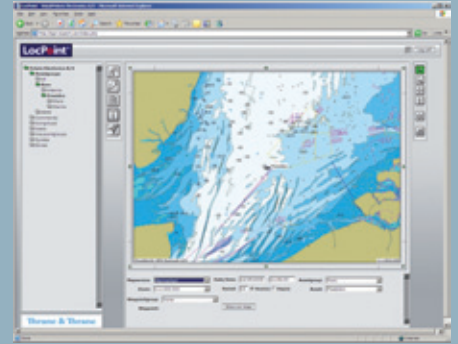

With LocPoint it becomes easy to keep track of even the largest fleets as the user friendly interface makes it simple for users to assign vessels to specific groups along with icons or pictures.

Landmobile

Geofencing with LocPoint

Detailed chart information and position information

### User defined position reporting

It is also possible to set the reporting interval in relation to the vessel's position. For example, a freight forwarder can be notified automatically when a vessel is within a certain preset distance from its destination. This gives the maximum level of information when needed and reduces air time costs.

### Geofencing

A wide array of tracking functions allows users to track and manage assets. These include the ability to create geofences by setting up alarms in relation to a vessel's position. Should a vessel veer in or out of a preset zone an alarm can be sent to a predetermined user via an e-mail, fax or SMS.

### Optimal data security and stability

The system runs on a UNIX server park with multiple redundancies and power failover for heightened data stability and security. Additionally, outside access to the system is managed by high level firewalls and can be configured with a high level of encryption. LocPoint will operate on most internet connected PCs and minimizes strain on both hardware and the internet connection by running on low connection speeds.

To sign up a SAILOR mini-C terminal to LocPoint, simply fill out the LocPoint Registration Form found at [www.thrane.com](http://www.thrane.com) or contact your nearest Thrane & Thrane distributor.

### 50 years of maritime tradition

In 2004 Thrane & Thrane acquired the SAILOR brand, adding more than 50 years of experience in maritime communication to our range. Thrane & Thrane now offers a complete selection of reliable, innovative and user friendly maritime solutions that improve safety and daily life at sea. Our SAILOR products range from VHF and MF/HF to complete GMDSS solutions over Inmarsat-C, mini-C, mini-M, Fleet, Iridium and SSAS solutions.

### World Class Service worldwide

When buying Thrane & Thrane you buy not only state-of-the-art technology but peace of mind. We are renowned for our World Class Service program. Distributors and service centers in harbours all over the world are supported by Thrane & Thrane so they in turn are able to support you in accordance with our World Class Standards.
